

Upcoming Webinar: Developing a Food Procurement Policy or Profile

Tuesday, May 28 | 2 - 3:15pm EST

Organized by the Chesapeake Farm to Institution Work Group for institutional food service, school nutrition service, sustainability professionals, food system practitioners, producers and producer groups

CHESAPEAKE
FOODSHED NETWORK
CATALYZING CONNECTIONS & COLLABORATIONS

The Chesapeake Farm to Institution Work Group (FTI) is a collaboration between Health Care Without Harm and The Chesapeake Foodshed Network. FTI facilitates learning, connection, and action that supports farm to institution efforts in the Chesapeake Bay watershed.

This webinar will provide guidance on how a school, college, or hospital can develop a food procurement policy or profile. Developing a policy or profile can institutionalize good food values that prioritize support for local farmers and food producers, sustainable or regenerative agriculture practices, and women and minority-owned farms and food businesses.

The discussion will include:

- how to facilitate an inclusive process that engages those who will be most impacted in the policy or profile,
- types of language to include, and sample templates,
- the process for developing and approving a policy or profile.
