Participatory Grantmaking Journey

The Shared Gifting Simulation was offered as part of The Chesapeake Foodshed Network's Participatory Grantmaking Journey. The Journey provides an opportunity to engage in transformational learning and build a new culture around funding in the food system.

Participatory grantmaking & shared gifting circles are mechanisms to shift power, include community in decision-making, & increase collaboration, solidarity and accountability.

During 2019, CFN is hosting a three-part participatory grantmaking series, which culminates in a true shared gifting event. The three parts of the Journey are intended to build on one another but can stand alone. Funders, community members, Network leadership, and potential grant applicants are invited to participate. Everyone is welcome!

Using new skills gained from the Simulation, CFN will offer an opportunity for the Network, funders, and community to participate in a true shared gifting event.

Engage in transformational learning and help build a new culture around funding in the food system by joining the CFN and the New England Grassroots Environment Fund in contributing funding to support this Shared Gifting Event.
